

Kanjam rules

Before You Play

The Kanjam “Kans” are placed 50’ apart with the slots facing each other. Either 2 or 4 players can play. Teammates are opposite one another at the Kans. Players may move about however they need to but they cannot touch the Kan.

Playing the Game

First, slip a coin, the frisbee or something to determine who goes first. The first team goes first, so both players throw before the other team throws. You must throw from behind the front edge of the Kan.

Scoring is as follows:

1 point: Your teammate deflects the disc to hit the Kan

2 points: The disc hits the Kan with no intervention from your teammate

3 points: Your teammate deflects the disc into the top of the Kan

Instant Win: The disc goes through the slot in the front of the Kan

The goal is to hit 21 points exactly. If you exceed 21 then the points are subtracted from your original score. For example if you have 19 points and your teammate deflects the disc into the Kan, you lose 3 points down to 16.

Deflecting the disc has certain rules. You cannot carry or at any point catch and throw the disc. The best way to do it is use the back of your hand or use both hands together.

You cannot double hit the disc.
